

Early childhood education is the key to the betterment of society.

Dr. Maria Montessori

As another successful year is almost coming to a closure it is wonderful to see how all the friends of Sunflower classroom have grown together in making the classroom as busy as could be. Everyone has made tremendous progress all year long. They are advancing academically and learning important life skills as well. We would like to thank all the parents who could attend the Parent-Teacher conferences and see the classroom. This month we got the 'Butterfly Kit' and children will see how butterflies evolve through the many stages. We welcomed Colette, Leslie and Gracelyn from the Toddler classroom. Jayson and Talha joined as new friends.

Practical life: With the advent of Spring, it is cleaning time around the house and classroom and children are learning how to sweep the floor and dust the shelves. They are also learning how to scrub and clean vegetables. Additionally, they keep on working with spooning tonging, crumbing, push-pinning, lacing etc. in a consistent manner.

Sensorial: In Sensorial, friends are working on improving their tactile sense through works like fabric-matching and touch boards. Working with the metal insets helps them in creativity as they make countless colorful shapes and designs They are learning dimensions and shapes through geometry works.

Language: In Language, some older friends are well on their way to reading books while others are diligently working on increasing their knowledge of the sounds of the words and matching them with corresponding picture cards. They are also improving their hand-writing skills by practicing it. Younger friends are being introduced to the beginning sounds of the alphabets.

Math : in Math, some friends are learning to sequence numbers up to 100 with the help of ten boards work and hundred boards work.. This helps them to recognizing the number pattern and the numeral itself. Others are working on learning the teen numbers. The younger friends are well advancing on combining numbers with quantity. Some older friends are working with abstract operations.

Science: This month we are busy learning all about weather pattern that comes with Spring. We learned the rain-cycle and how it incorporates evaporation, condensation, and precipitation. We will be working on life-cycle and parts of a butterfly.

Culture: In Culture, we continue to explore our continents and the countries in each of them. The younger friends are learning about land and water parts of our globe.

Important Reminders:

1. We will be celebrating Mother's Day on 05/11/18 from 10-11 AM.
2. May 22,2018- Memorial Day School closed.

Regards

Sunflower classroom teachers.
